**\*\*Please remember:** The MHRT Program is open to students from across the US, not just to academic schools and/or institutions that received a MHRT grant. If an applicant is interested in applying to a program, they can follow up with the individual program's contact person, as listed on the institution's website. Each site that received a grant should have a MHRT website with information about the program, how to apply, requirements for acceptance, and contact personnel.
